

NORTH WATER CANOE SPRAY DECK ORDER FORM

You are about to order a custom made Spraydeck that will be one of the most important pieces of gear you will use with your canoe. With a little care it will serve you for a lifetime of adventure and exploration.

North Water Spraydecks have been used world wide for just about every major canoe expedition over the last fifteen years. We are known to go out of our way to make sure your Spraydeck fits not only your boat but your specific needs. If you are planning a 1000 mile trip across the artic or a weekend getaway, you have our commitment that your deck will serve you anywhere your sense of adventure takes you.

The following form will provide us with the information we need to build your Spraydeck quickly and accurately. After completing this form in its **entirety**, please review the information for accuracy; you can then fax it to 604-264-0821 or email it to northwater@northwater.com.

If you have any questions or need help completing this form, call us at 604-264-0827 or email us.

For more information visit our website at www.northwater.com. There you can view photos, accessories, installation instructions and download additional forms.

TAKING MEASUREMENTS

In order to ensure the fit of your deck **this form must be completed in its entirety.**

We recommend that you work with two tape measures. Take the first tape measure and lay it down the centre line of your boat, start at the bow and finish at the stern. Allow the tape measure to lie along the centre line following the profile of your canoe. Do not pull the tape tight as this will not give an accurate measurement. Use sticky tape to secure ends of tape to bow and stern caps. This will allow you to take all the length measurements. Now use your second tape measure to take width measurements every two feet along the length of canoe.

When measuring dimensions please:

Take all measurements in inches only, round to nearest ¼ inch.

Take all length measurements from front tip of bow to center of thwart(s) and back of seat(s).

Take all width measurements from outside of gunwale to outside of gunwale.

Important Note: Canoes with adjustable seats, **ONE** position must be chosen.

TANDEM CANOE

Measure in inches		Measure in inches	
1 - Distance to back of bow seat:		Width of Canoe at that point:	
2 - Distance to centre of bow thwart:		Width of Canoe at that point:	
3 - Distance to centre of centre thwart:		Width of Canoe at that point:	
4 - Distance to centre of rear thwart:		Width of Canoe at that point:	
5 - Distance to back of stern seat:		Width of Canoe at that point:	
6 - Overall length of canoe:			

SOLO CANOE

Distance to centre of bow thwart:		Width of Canoe at that point:	
Distance to centre of centre thwart:		Width of Canoe at that point:	
Distance to back of seat:		Width of Canoe at that point:	
Distance to centre of rear thwart:		Width of Canoe at that point:	
Overall length of canoe:			

Diagram 1

Foot	Width	Foot	Width	Foot	Width	Foot	Width
2		8		14		20	
4		10		16		22	
6		12		18		24	

Diagram 2

Width of End Cap every 2 inches from End

Inch	Width	Inch	Width
2		8	
4		10	
6		12	

Total Length:

Does your canoe have built-in flotation tanks? (Specify location on diagram 3).

Length of Spare Paddle:

Additional Information

Use the diagram below to indicate the location of accessories you would like included on your Spray deck. Keep in mind that not all accessories you choose may fit on your Spray Skirt, this will vary depending on the size of your canoe and type of accessories you choose. We will contact you to work out the details if space becomes a factor.
